PROFILE

I am Bagus Wahyu, a final-year Information Technology student at Udayana University and Machine Learning Graduate from Bangkit Academy Batch 2 2024. Passionate about Data Science, Artificial Intelligence, and data-driven system development, with hands-on experience in building machine learning models, analytics dashboards, and intelligent applications to support real-world decision making. Experienced in collaborative project environments and accustomed to applying analytical and problem-solving approaches to business and technology challenges. Highly motivated to continuously learn, adapt to new technologies, and contribute effectively within a team-oriented environment.

EDUCATION

Udayana University *(2022 – Expected 2026)*

Undergraduate Student of Information Technology | Cumulative GPA: 3.97/4.00

SMAN 1 Mengwi *(2019 – 2022)*
Class of Science | Passing Grade: 88.45

TECHNICAL PROJECTS

BIT FUTURE: Intelligent Bitcoin Price Prediction Dashboard & Bot

Time-Series Forecasting, AI Analytics & Full-Stack System Development *Mar 2025 – Jul 2025*

- Developed Bitcoin price forecasting system using Prophet time-series model trained on historical market data, integrated with technical indicators (RSI, MA, Bollinger Bands) for data-driven prediction.
- Built interactive analytics dashboard using React.js and Flask, aggregating real-time market data, sentiment analysis, Fear & Greed Index, and AI-assisted market analysis and decision-support recommendations (Buy/Hold/Sell).
- Implemented Telegram Bot using Python to deliver real-time predictions, market insights, and automated investment recommendations through conversational interaction.

AJEG BALI: *Jejahitan* Bali Classification App

Deep Learning Model & Android Application Development *Sep 2025 – Present*

- Trained and optimized a robust deep learning architecture utilizing MobileViTv2 integrated with a Convolutional Block Attention Module (CBAM) to achieve high-accuracy feature extraction.
- Implemented incremental learning strategy as a core novelty, enabling the model to add new *jejahitan* classes using few-shot data without full retraining, improving scalability and long-term usability.
- Developed an Android-based application integrating the trained model to classify Balinese *jejahitan*, providing item names, cultural descriptions, and instructional video references.

AI-Powered Image Editor Web Application

Project Lead & Full-Stack AI Development *Sep 2025 – Dec 2025*

- Developed and deployed multiple AI image-processing models (Face Swap, Face Restoration, Face Blur, Old Photo Restoration) using Python, integrated via Hugging Face API for scalable backend inference.
- Built full-stack web platform using React.js (frontend) and Flask (backend), enabling real-time AI-based image editing and processing features.
- Led integration of team-developed modules, consolidating 30+ image processing and AI features including transformations, visual effects, document tools, generative AI editing, and automated face enhancement pipelines.

EXPERIENCE

Bangkit Academy Batch 2 2024

Machine Learning Graduate *Sep 2024 – Jan 2025*

- Completed industry-led Machine Learning learning path through independent online study, covering CNN, NLP, GANs, Time Series Prediction, TensorFlow Deployment, and ML Specialization via Coursera.
- Developed practical skills in data preprocessing, model training, evaluation, and deployment using Python and TensorFlow-based frameworks.
- Strengthened professional competencies including English communication, growth mindset, adaptability, and collaborative problem solving through structured soft-skill training.
- Collaborated in a multidisciplinary capstone team (Machine Learning, Cloud Computing, Mobile Development) to build SureVenir, an Android application for Balinese souvenir recognition and fair-price information.
- Built and deployed a CNN-based image classification model (MobileNetV2) achieving 96.19% validation accuracy and developed a GenAI chatbot utilizing Google Cloud Vertex AI to provide souvenir descriptions, price ranges, and purchase recommendations.

ORGANIZATION EXPERIENCES

Unit Kegiatan Mahasiswa (UKM) Jegeg Bagus Udayana

Vice Chairman II *Jan 2024 – Dec 2024*

- Assisted the Chairman and Vice Chairman I in executing their duties, ensuring the smooth operation and coordination of the organization's activities.
- Collaborated with the treasurer to manage and allocate the budget for various events and activities, ensuring financial efficiency and transparency.
- Collaborate with the head of the public relations and design division in managing the official @jegegbagusudayana social media account.
- Successfully connected internal and external needs.

Himpunan Mahasiswa Teknologi Informasi (Information Technology Student Association)

Staff of Scientific Competition Division *Mar 2023 – Dec 2023*

- Successfully gathered and disseminated information on over 20 IT-related competitions each month, providing valuable opportunities for student participation and engagement.
- Provided support and assistance to students participating in competitions, including preparation tips, practice sessions, and feedback.
- Coordinated with faculty members to secure mentors for students participating in competitions, ensuring they received appropriate guidance and support.

Fungsionaris Kelompok Studi Technology Artisan

Staff of Design & Publication *Jan 2023 – Dec 2023*

- Successfully created over 20 Instagram posts and stories, increasing the group's online presence and engagement with followers.
- Designed exclusive merchandise for competition winners, enhancing the visibility and prestige of the group's events using Figma and Photoshop.
- Provided comprehensive documentation for each event, including photos, videos, and written summaries, ensuring detailed records and promoting future activities.

VOLUNTEER EXPERIENCES

Techno Futsal Tournament 2024

Member of Event Division *Jan 2024 – Mar 2024*

- Build an interesting concept of the events and plan the details, including event drafts and rundowns.
- Served as the MC for the opening and closing ceremonies of the tournament, ensuring a lively and engaging atmosphere.

Pilmapres TI 2023 (Selection of Information Technology Outstanding Students)

Member of Event Division *Jul 2023 – Aug 2023*

- Served as the MC for the peak event of the selection of outstanding students, engaging the audience and ensuring a smooth flow of the program.
- Ensured the event adhered to the schedule, coordinating with speakers, performers, and other participants to maintain punctuality.

ITCC 2022 (Information Technology Creative Competition 2023)

Member of Quiz Contest Competition *Sep 2022 – Nov 2022*

- Successfully attracted a larger number of participants compared to previous years, enhancing the competition's scope and diversity.
- Created comprehensive and challenging IT-related quiz questions along with accurate answers, contributing to a high-quality competition.
- Coordinated with judges to establish clear and fair assessment criteria, ensuring consistency and transparency in the evaluation process.

HONORS AND AWARDS

4th Runner Up Bagus Udayana 2023

Jegeg Bagus Udayana University 2024

Bagus Berbakat Udayana 2023

Jegeg Bagus Udayana University 2023

Winner of Bagus Teknik 2023

Jegeg Bagus Faculty of Engineering 2023

Best Graduate of SMAN 1 Mengwi 2022

Class of Science at SMAN 1 Mengwi

KEY SKILLS AND COMPETENCIES

Skillsets – Public Speaking, Problem-Solving, Project Management, Leadership, Teamwork, Creative Thinking.

Toolsets – Python (Machine Learning, Deep Learning, TensorFlow, PyTorch, Scikit-learn, Flask, Data Processing & Model Deployment), React JS, SQL, Basic Java (OOP Fundamentals), Web Development (HTML, CSS, PHP).

Languages – Indonesian (Native), English (Intermediate).
